The Leader in Fisheries Catch Reporting

Any fishery, any gear, anywhere on Earth, FisheriesApp is the data collection tool that does it all

FisheriesApp puts the needs of fishermen first

FisheriesApp was created specifically for fishers and fisheries managers. It makes it quick and easy for fishermen to collect and manage all their fishing data in one place and streamlines data review for fisheries managers.

FisheriesApp is the most flexible Fisheries data collection system on the market

Fisheries are complex, but your data collection doesn't need to be. FisheriesApp is highly configurable catch reporting software that meets the unique challenges of at-sea data collection and fisheries management. You're the expert on what you do, which is why FisheriesApp allows you to capture the exact data you want, and you can add or remove optional fields at any time – no hassle, no fees, and no restrictions.

"Vericatch's anytime anywhere data submission capability makes reporting simple and efficient."
