

Canadian ELOGS by Vericatch

Turn your reporting challenges into opportunities

Compliance without confusion

Reporting your catch has never been easier. Whether you're fishing lobster, groundfish, or herring, with our ELOG software, you'll spend less time reporting and more time fishing.

How? Just fill in our user-friendly reporting forms, and we make sure your data gets to the right people – securely. Our software adheres to – or exceeds – industry standards for data protection and encryption, so your data will never get into the wrong hands.

Catch reporting made easy

We can support any Canadian National ELOG specification and will be certified providers of the national Lobster ELOG in March 2022 and the national Crab ELOG in May 2022.

Core Features

- Configurable to any fishery, vessel, or gear type
- The most secure logbook in Canada
- Trusted by Canadian fishers for over a decade
- Offers catch and revenue analytics
- Syncs with leading traceability software
- Works on the Android or iOS smartphone, tablet, or computer you already own
- Flexible pricing starting at just \$60 per fishery per year

“Vericatch’s approach of working closely with fishermen helps them create user-friendly, efficient, cost-effective tools. Their software seamlessly addresses changing priorities and management objectives to meet the needs of industry users.”

Bruce Turris, The Canadian Groundfish Research and Conservation Society Executive Manager and representative for the BC commercial groundfish trawl industry
