

The Leader in Fisheries Catch Reporting

Any fishery, any gear, anywhere on Earth, FisheriesApp is the data collection tool that does it all

FisheriesApp is created with the entire supply chain in mind

FisheriesApp was created with both fishers and fisheries managers in mind. Whether you're an NGO, a fishery manager, or a harvester, FisheriesApp helps you get the data you want, where you want it, quickly and in the right format.

FisheriesApp is the most flexible electronic catch reporting system on the market

Fisheries are complex, but data collection doesn't need to be. Our highly configurable FisheriesApp tool allows fishermen and fisheries managers to capture the exact data they want with the freedom to add or remove fields at any time – no hassle, no fees, and no restrictions. With time-saving tools like autofill, predictive text, and saved profile preferences, catch reporting has never been easier.

“FisheriesApp made it easy and fast for me to input and submit Blue Swimming Crab data. The arrangements of the data form was more efficient than an Excel sheet.”

Bagus Santoso, enumerator from Lampung Province, Indonesia

Benefits

- Designed to work on any smartphone, tablet, or computer
- Fully functional both on- and off-line
- Flexible, highly configurable fishing data collection forms
- Powerful data analytics and visualizations
- Used worldwide in Fishery Improvement Projects (FIPs)
- Offers multiple language support, including French, English, and Spanish, with more languages to come
- Interfaces with government and regulator databases around the world
- Meets – or exceeds – all industry security requirements
- Exports to Seafood Traceability to help access premium markets
